

# USH Module 3 Station #3

In this station you are being asked to create a total of **2 Multiple Choice questions** and answers. Follow the template below for your 2 questions and supply the necessary information to complete each question. Along with this information, you will also provide 4 possible answers for each question. These possible answers will include the correct answer and 3 other possibilities that are relative to the question. Any additional information needed for each question will be in BLACK, answers in BLUE and the topic in RED. These questions should span the entire unit and you may use your Notes, Handouts, Review, etc. Finally, create an answer page to record the correct the answers (number them 1-10 to match the questions). Once you are finished with your 2 questions find a partner and swap questions. Make sure you find someone that created different questions than you. You might need to find an additional partner to find the 2 questions needed!

**Have your partner initial next to the question they provided.**
